Mind Games

Olive Peart

Mind Games is a compelling story of an eleven-year-old boy, Matthew, who has the uncanny gift of being able to influence people's thought processes, sometimes unintentionally. Physically, he is short of stature so he is bullied by some of his peers. To defend himself, Matthew learns to perfect the art of playing games with the bullies' minds.

The story turns deadly when some boys, having become aware of his powers, befriend him and coerce him into playing dangerous games of criminal mastermind. This leads to a series of events that land some of the characters in trouble with the law and one in the hospital at death's door.
